## PRODUCT OVERVIEW

The RP209 Ropegrab is fitted with a pip-pin axle, making it quick and easy to attach/detach from the rope, mid-line. A thumb operated push-button is used to disengage the Pip-pin mechanism and the axle has a chamfered end, to allow for easy location of the pin.

The RP209 has a textile Pip-pin retention cord, (rather than a wire cord). The textile cord allows for easy maneuvering of the pin and does not snag, or wear with sharp edges.
